

WWTP Slavonski Brod

Name of Employer: Hrvatske Vode

Execution time: 2012 - 2014

Address: Stanka Vraza b.b.
35000 Slavonski Brod
CROATIA

Capacity of the plant:

Physical production rate: 23.030m³/d for the Biological Stage (rain water average)

Physical size: 80.000 PE

Methods/Technology: mechanical, biological and chemical treatment

Scope of Performance:

The scope of works included designing, construction, completion and commissioning of a WWTP Slavonski Brod with SBR technology. The waste water treatment plant treats the wastewater with a capacity of 80.000 PE and consists of primary, secondary and tertiary wastewater treatment (total N&P reduction), sludge treatment with anaerobic digestion, sludge thickening, dewatering and biogas treatment.
