

WWTP VIENNA

Name of Employer: ebswien kläranlage & tierservice
Ges.m.b.H.

Execution time: 2014-2021

Address: 11. Haidequerstraße 7
1110 Wien
Austria

Capacity of the plant

Flow: 9,4m³/s dry weather, 18m³/s rain weather

Capacity (citizen equivalent): 4.000.000 PE

Technology: Mechanical, biological, chemical treatment, sludge digestion

Scope of performance:

Delivery and assembly of mechanical equipment:

Mechanical engineering and construction of water treatment line: Penstocks and water flow control devices, steel works & steel pipeline construction including instrumentation, ventilation, circulation and mixing devices, primary sludge screws, floating sludge scrapers, floating sludge extractors, VKB and ZKB belt scrapers

Mechanical engineering and construction of sludge treatment line: Gas technology, heat exchangers, pumps, lime preparation, pressure systems and pipelines, sprinklers, compressed air systems including piping, spraying systems, biofilter systems, heat exchanger, pipeline construction in stainless steel, all steel works.
